Aerospace & Defense Industries Market Research and Consulting

For over 50 years, FI's Intelligence reports have been the global Aerospace and Defense industry standard for accurate research, analysis, and projections. Our experienced analysts compile, evaluate, and present accurate data for decision makers. FI's market research reports offer concise analysis of individual programs and identify market opportunities.

Market Intelligence Service Formats

FI GLOBAL INTELLIGENCE

FI Global Intelligence is Forecast International's secure online platform providing comprehensive access to its market data, analysis, and forecasts across the global aerospace, defense, and power systems sectors. Designed to support strategic planning and decision-making, it offers up to 15 years of forecast data and 10 years of historical data, with customizable queries by date range, platform, category, geography, company, and currency. Reports and market segment analyses are continuously updated, with interim updates issued to highlight significant developments. Licensed for individual or multi-user access, FI Global Intelligence combines the depth of Forecast International's proprietary datasets with the convenience of continuous online availability—delivering authoritative insights that enable informed, data-driven strategies.

BINDER

Provided initially as a complete binder; monthly supplements of reports in hard-copy format are shipped via courier services during the annual subscription period. Subscription includes a quarterly CD containing 10-year unit and value of production forecast statistics in Excel format. This service lacks the timeliness of our other formats, but provides the advantage of a printed account for ready reference. Note that shipping and handling costs apply.

FTP

CORPORATE & WORLDWIDE ENTERPRISE LICENSES

Forecast International Inc. offers Online data delivery solutions for every possible requirement. Licensing of any combination of our annual Market Intelligence Services, ranging from single, identified user(s) via username and password to unlimited worldwide corporation utilization via an exclusive Web Portal, is available. Contact us at 203-426-0800, 800.451.4975 (U.S. & Canada) or Sales@forecastinternational.com for a confidential discussion of your intelligence requirement.

The Science of Forecasting

For more than 50 years, Forecast International has delivered forward-looking aerospace and defense intelligence powered by a proven, analyst-driven methodology. We help leaders anticipate change, evaluate risk, and make confident production and investment decisions.

What Is Forecasting?

Forecasting evaluates future demand for defense and aerospace systems and the resources required to produce them. It identifies how many platforms will be built over a defined period, helping organizations anticipate market shifts, plan production capacity, and make informed strategic decisions.

FI Methodology

Our forecasting methodology combines qualitative analyst expertise with comprehensive global data. Analysts assess geopolitical conditions, economic indicators, operator requirements, production histories, order backlogs, and technical specifications. These insights are reviewed collaboratively across our aerospace, engines, defense electronics, and international military markets teams to ensure accuracy, consistency, and depth across all projections.

Boost Your Strategy

Effective production forecasting prevents minor issues from becoming major roadblocks and positions your organization to anticipate customer needs ahead of time.

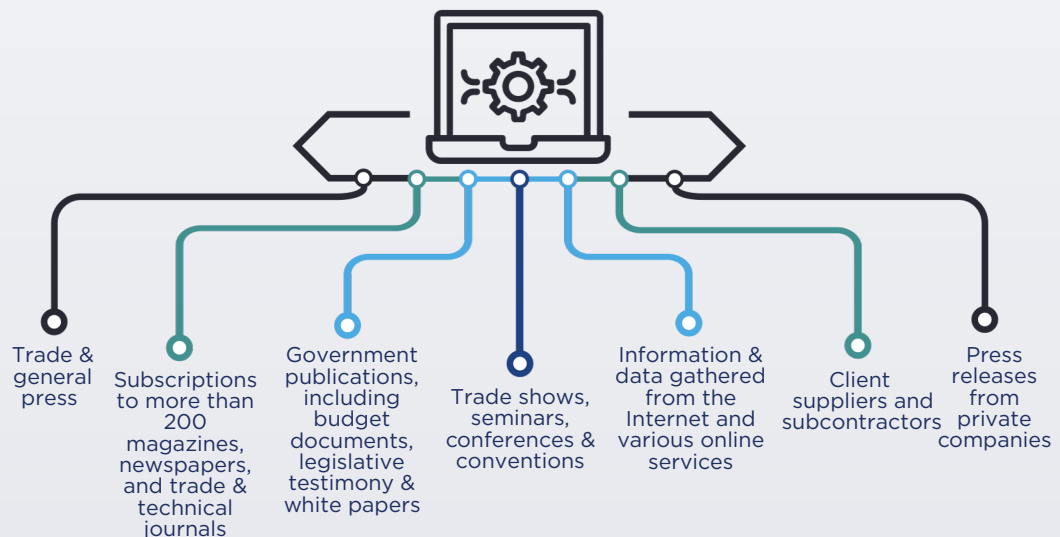

- **Compare:** Benchmark production outlooks across competing programs.
- **Estimate:** Plan materials, labor, supply chain needs, and capacity requirements.
- **Evaluate:** Assess program value, OEM strength, and long-term market trends.
- **Engage:** Identify new opportunities, growth areas, and capability gaps.
- **Optimize:** Streamline internal processes and improve operational efficiency.

FI Forecast Drivers

FI Global Intelligence Sources

Our intelligence is synthesized into long-range forecasts for every system in production or development, grounded in projected market share and program trajectory. Forecasts draw on a wide range of authoritative data sources to ensure reliability and analytical rigor including:

FI Global Intelligence At-A-Glance

FI Global Intelligence enables you to create user-defined market segments by selecting the platforms, regions, currencies, and forecast periods most relevant to your strategic objectives. The platform generates instant visualizations and long-range forecast outputs that reveal market trends, competitive positioning, and emerging opportunities. Each result is reinforced with full market reports, Forecast Rationales, Excel datasets, and additional analytic resources—providing the depth and confidence required for informed, data-driven decision-making.

Aviation Systems (Civil & Military)

AIRBORNE RETROFIT & MODERNIZATION FORECAST

This service contains 60 reports providing in-depth coverage of R&M markets for Fighter/Attack/Trainer Aircraft, Commercial & Military Transports, Light Aircraft, Military Rotorcraft, and Engines. Reports cover out-of-production aircraft as well as models currently in operation. Also included are three Market Segment Analyses providing unit and value market projections. Nine appendices, including a comprehensive listing of modernization programs by platform, complete the package.

CIVIL AIRCRAFT FORECAST

Civil Aircraft Forecast includes 65+ detailed reports covering all facets of the fixed-wing commercial and private aviation industries. Four Market Segment Analyses provide in-depth examination of the markets for Large Commercial Jet Transports, Regional Aircraft, Business Jets, and General Aviation/Utility Aircraft. Also features seven appendices, including updated consolidated production statistics and a historical production table.

MILITARY AIRCRAFT FORECAST

Military Aircraft Forecast provides full coverage of fixed-wing military aircraft of all types in 50 individual reports. Four Market Segment Analyses offer complete overviews of the Fighter, Military Transport, Military Fixed-Wing Trainer, and Special Mission Aircraft markets, including trend analysis, program milestones, and computations of projected market shares of all competitors. Also features 10 appendices, including consolidated production statistics, a 10-year historical production table, inventories, and a listing of aircraft by powerplant.

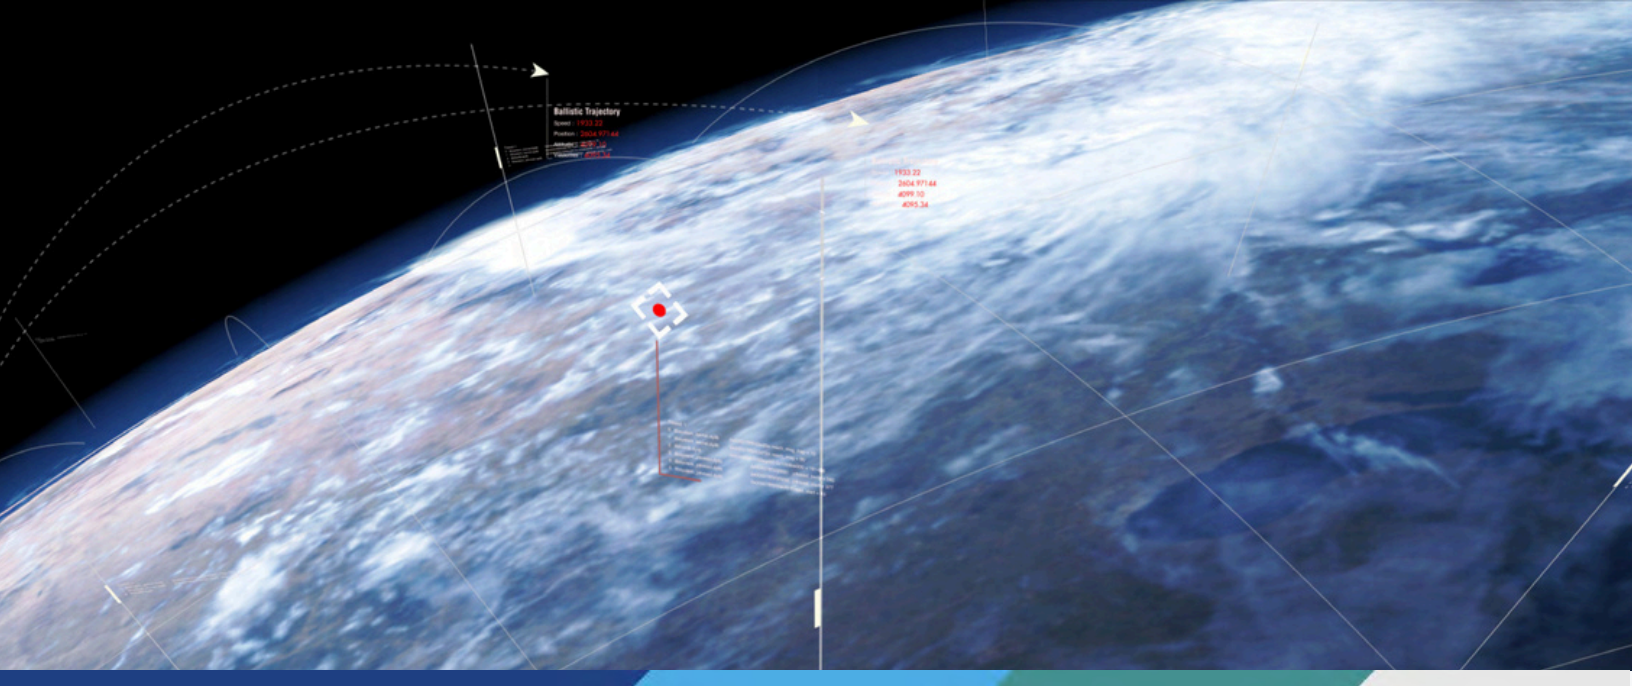

ROTORCRAFT FORECAST

Rotorcraft Forecast includes nearly 60 reports covering the turbine-powered and piston powered rotorcraft markets. Worldwide coverage includes detailed reports on Russian and Chinese rotorcraft. Two Market Segment Analyses explore the dynamics of the Military Rotorcraft market, and Commercial Rotorcraft market.. Also contains six appendices, including listings of military and civil rotorcraft inventories, consolidated production statistics, and a 10-year historical production table.

AVIATION SYSTEMS GROUP LIBRARY

An annual subscription to this group library comes complete with four Market Intelligence Services containing 235+ individual reports, 13 Market Segment Analyses, 4 Excel spreadsheets containing overall market unit and value production data, and 32 appendices. Group library costs include a pre-discount.

Space Systems

SPACE SYSTEMS FORECAST - LAUNCH VEHICLES & CREWED PLATFORMS

Space Systems Forecast - Launch Vehicles & Crewed Platforms features nearly 50 reports that cover the worldwide launch vehicle market and crewed platforms, each featuring technical specs, program reviews, and production forecasts. Also included is a Market Segment Analysis covering the prospects for Orbital Launch Vehicles. Seven supporting appendices include consolidated production statistics and a launch history table broken out by launch date, payload name, and other factors.

SPACE SYSTEMS FORECAST - SATELLITES & SPACECRAFT

Space Systems Forecast - Satellites & Spacecraft includes 85+ reports presenting global coverage of spacecraft ranging from smallsats to large comsat, along with scientific spacecraft. New reports on emerging programs are added frequently. Features three Market Segment Analyses - The Market for Commercial Communications Satellites, The Market for Military Satellites, and The Market for Civil & Commercial Remote Sensing Satellites. Also includes a review of the U.S. Government's Space Budget, along with seven appendices, including consolidated production statistics.

SPACE SYSTEMS GROUP LIBRARY

An annual subscription to this group library comes complete with two Market Intelligence Services containing 135+ individual reports, 4 Market Segment Analyses, 2 Excel spreadsheets containing overall market unit and value production data, and 14 appendices. Group library costs include a pre discount.

Naval Systems

NAVAL VESSELS FORECAST

The Naval Vessels forecast features 75+ reports on major submarine, aircraft carrier, amphibious warfare, surface combatant, auxiliary, and unmanned vessels that are slated to dominate the warship industry over the next decade and beyond. Each report features the vessel's forecasted production, estimated cost, major contractors and component suppliers, variants, relevant contracts awarded, full design history, and a wealth of information on the ship's performance and operational capabilities. This forecast also features analyses of key markets such as submarines, surface combatants, and unmanned vessels.

NAVAL WARFARE SYSTEMS FORECAST

The Naval Warfare Systems forecast features 70+ reports on major anti-submarine warfare, sonar, torpedo, mine warfare, and naval weapon systems that are slated to dominate the warship industry over the next decade and beyond. Each report features the system's forecasted production, estimated cost, major contractors and component suppliers, variants, relevant contracts awarded, full design history, and a wealth of information on the system's performance and operational capabilities. This forecast also features analyses of key markets such as airborne anti-submarine warfare sensors, sonars, and torpedoes.

NAVAL SYSTEMS GROUP LIBRARY

An annual subscription to this group library comes complete with two Market Intelligence Services containing 145+ individual reports, 3 Market Segment Analyses, 2 Excel spreadsheets containing overall market unit and value production data, and 7 appendices. Group library costs include a pre-discount.

Power Systems

AVIATION GAS TURBINE FORECAST

Aviation Gas Turbine Forecast provides coverage of all major civil and military engine programs worldwide. Each report includes tech specs and estimated pricing, as well as unit and market value forecasts, making this volume the ultimate resource on the full expanse of this market. Contains 80+ reports, each with a production forecast and supporting rationale. Five Market Segment Analyses cover the markets for Turbofans, Turboshifts, Turboprops, Turbojets, and Aviation APUs. Features seven supporting appendices, including consolidated production statistics and a table providing 10 years of aviation gas turbine historical production.

INDUSTRIAL & MARINE TURBINE FORECAST (GAS & STEAM)

Industrial & Marine Turbine Forecast (Gas & Steam) provides the tools required to make strategic decisions in an expanding marketplace – including tech data, prime and affiliated contractor listings, descriptions of engine variants, and news on notable contracts. Reports provide production forecasts for almost 70 programs – from 65 kW to over 500 MW. Includes five Analyses covering the markets for Microturbines, Mechanical Drive, Electrical Power Generation, Marine Power, and Steam Turbines for Combined-Cycle Installation. Features eight appendices, including a breakout of consolidated production statistics and a directory of I&M turbine manufacturers and packagers.

POWER SYSTEMS GROUP LIBRARY

An annual subscription to this group library comes complete 150+ individual reports, 10 Market Segment Analyses, 3 Excel spreadsheets containing overall market unit and value production data, and 15 appendices. Group library costs include a pre-discount.

Weapons Systems

MILITARY VEHICLES FORECAST

Military Vehicles Forecast includes 50+ reports covering more than 90 individual military vehicle programs, plus four individual Market Segment Analyses for Tracked, Wheeled and Unmanned Vehicles, as well as Tanks. Featuring production forecasts with Forecast Rationales and discussions of overall trends, this forecast provides an understanding of the entire global market for military contexts across these diverse segments. Also provides several appendices, including consolidated production statistics, a listing of available vehicle turrets and armament, and archives.

MISSILE FORECAST

Missile Forecast covers the worldwide market for tactical and strategic missiles, both developmental and in production. Each of its 150 reports includes a program review, technical data, contractors, funding charts, worldwide sales data, and a production forecast. Five Analyses (Strike, Air- to-Air, Anti-Ship, Surface-to-Air, and Anti-Tank) examine the factors driving individual market segments. Features five appendices, including consolidated production statistics and a list of the missiles purchased by a country.

ORDNANCE & MUNITIONS FORECAST

The Ordnance and Munitions product includes 45+ comprehensive reports covering key artillery systems, rocket launchers, and munitions. Two market analyses provide in-depth examination of the markets for Artillery Systems and Multiple-Launch Rocket Systems. The product also features two appendices covering the markets for Artillery Systems, and Multiple-Launch Rocket Systems, including updated 10-year consolidated production statistics.

UNMANNED VEHICLES FORECAST - AIRBORNE SYSTEMS

This service provides extensive coverage of airborne unmanned vehicles (UAVs), including dedicated markets for reconnaissance UAVs and aerial targets. Each of the nearly 95 reports features a comprehensive program review, technical data, funding charts, worldwide sales data, a forecast rationale, and a production forecast. New reports on emerging programs are added frequently. The package features five appendices, including consolidated production statistics.

WEAPONS SYSTEMS GROUP LIBRARY

An annual subscription to this group library comes complete with four Market Intelligence Services containing 340+ individual reports, 9 Market Segment Analyses, 5 Excel spreadsheets containing unit and value production data, and 31 appendices. Group library costs include a pre-discount.

Defense Technologies

AIRBORNE ELECTRONICS FORECAST

Airborne Electronics Forecast covers a full range of systems employed on various platforms, or currently in development. All 110+ reports contain production forecasts with a supporting Forecast Rationale. New reports are also added frequently on emerging programs. Also features Supplemental Programs and three Market Segment Analyses covering Airborne Radar Systems, U.S. Military Airborne Communications Systems, and Airborne Electro-Optical Systems. Contains six supporting appendices, including consolidated production statistics and a list of identified avionics applications by aircraft, and archives.

C5I - COMMAND, CONTROL, COMMUNICATIONS, COMPUTERS, CYBER & INTELLIGENCE FORECAST

C5I Forecast includes 95+ reports that provide a comprehensive overview of the C5I systems that equip today's armed forces, along with numerous Research, Development, Test, and Evaluation programs. Includes two Market Segment Analyses covering the markets for C5I and for Multimission Communications Systems. New reports are also added frequently on emerging programs. Five appendices, including consolidated production statistics, and archives complete the package.

ELECTRONIC SYSTEMS FORECAST

Electronic Systems Forecast covers a range of representative aerospace and defense electronics programs and systems. The latest developments in avionics, C5I, electronic warfare, and other select market sectors are examined. Reports provide funding or production forecasts. New reports are also added frequently on emerging programs. Includes an analysis of the U.S. Defense Electronics Market. Five appendices, including consolidated production statistics, and archives.

ELECTRONIC WARFARE FORECAST

Electronic Warfare Forecast provides coverage of the self-protection, jamming and electronic support measures systems, and decoy/dispenser programs in development or production for military platforms, both in the skies and on the surface. Included are 75+ reports on key U.S. and international EW programs and systems. New reports are also added frequently on emerging programs. Three Market Segment Analyses and five appendices, including consolidated production statistics, and archives.

Defense Technologies Cont.

ELECTRO-OPTICAL SYSTEMS FORECAST

Electro-Optical Systems Forecast keeps pace with advancing technologies in land, air and sea domains. This service includes some 68 market intelligence reports covering key U.S. and international EO technologies and R&D programs. New reports are also added frequently on emerging programs. Additionally, two Market Segment Analyses, covering Airborne EO and Land & Sea Based EO Systems, are featured. Also contains five supporting appendices, including consolidated production statistics, and archives.

LAND & SEA-BASED ELECTRONICS FORECAST

This service features 150+ reports that examine the key land & sea-based electronics systems and technology development programs that comprise this highly profitable market. New reports are also added frequently on emerging programs. Also includes Supplemental programs, three Market Segment Analyses and four appendices, including consolidated production statistics, and archives.

RADAR FORECAST

Radar Forecast covers a full range of U.S. and international systems covering the air, land and sea domains. Each of this product's 80+ reports contains a production forecast and supporting rationale. New coverage is also added frequently on emerging programs. Also includes Supplemental programs, three Market Segment Analyses and four supporting appendices, including consolidated production statistics, and archives.

DEFENSE TECHNOLOGIES GROUP LIBRARY

Our Military Electronic Systems Market Intelligence Services provide 10- or 15-year unit and value production forecasts for the full range of radar, communications, electro-optical and electronic warfare systems in use by today's militaries or currently in development. These products feature complete global coverage of the major players and details on market trends, plus Market Segment Analyses detailing the top programs in each segment. An annual subscription to this product comes complete with 7 Market Intelligence Services containing hundreds of individual reports, Market Segment Analyses, Excel spreadsheets containing unit and value production data, and 35 appendices.

Companies, Contractors & U.S. Defense Budget

DEFENSE & AEROSPACE COMPANIES, VOLUME I - NORTH AMERICA

This service includes coverage of key U.S. and Canadian aerospace and defense primes and their subsidiaries. Each of the 40+ reports contains data on recent programs, mergers, and joint ventures. Among the notable corporations covered are OEMs such as Boeing, Lockheed Martin, RTX, and General Dynamics. Also featured are Tier I, Tier II and newer contractors such as Pratt & Whitney, Honeywell, SpaceX, and Anduril.

DEFENSE & AEROSPACE COMPANIES, VOLUME II - INTERNATIONAL

This service includes coverage of top companies and subsidiaries outside North America, with a focus on key players in Europe and Asia. Each of the volume's 50+ reports contains data on recent programs, mergers, and joint ventures. Among the notable corporations covered are OEMs such as Airbus, Aviation Industry Corporation of China (AVIC), BAE Systems, and Embraer. Also featured are Tier I and Tier II contractors such as Rolls-Royce, Hanwha, Rafael, RUAG, and IHI Corporation.

INTERNATIONAL CONTRACTORS

Nearly 7,000 individual aerospace & defense contractors are cataloged, broken out by major market segment such as Aviation, Military Electronics, Naval, Power, Space, and Weapons. Further, this product cross-references more than 2,000 firms by specific components and subcomponents.

U.S. DEFENSE BUDGET FORECAST DATABASE

The U.S. Defense Budget Forecast Database is a streamlined, interactive platform that delivers quick access to the Pentagon's full acquisition budget. It offers historical and forecast data for Procurement and RDT&E programs, intuitive sorting tools, data visualizations, and downloadable Excel datasets. Advanced analytics reveal program winners and losers, consolidate scattered line items, and surface trends by market segment. With real-time congressional markup tracking and direct links to justification documents, the database provides a clear, comprehensive picture of U.S. defense spending.

COMPANIES, CONTRACTORS & U.S. DEFENSE BUDGET GROUP LIBRARY

The Companies, Contractors & U.S. Defense Budget Group Library brings together four core services covering global contractors, international and North American defense companies, and U.S. defense spending. It includes a directory of nearly 7,000 contractors, over 90 company reports, and the interactive U.S. Defense Budget Forecast Database with 5-year forecast and 5-year historical and real-time updates—providing a clear, data-driven look at the organizations and budget forces shaping global defense.

International Military Markets

The IMM report for each country comprises three segments: Data, Market Overview, and Force Structures. The Data segment provides full coverage of a nation's national and military budgets and discusses the geopolitical factors that will impact the country's military market. A key feature is a five-year defense spending forecast. The Market Overview reviews a country's military programs – from aircraft to warships – and provides details on plans for future procurement. Force Structures provides a detailed listing of all military manpower and hardware in the nation's inventory, including missiles, UAVs, military vehicles, aircraft, warships, and more.

IMM - ASIA, AUSTRALIA & PACIFIC RIM

The Asia-Pacific Rim region represents the center of a shifting global power dynamic. Burgeoning economies, large populations with more capital to spend, and conflicting ambitions between regional power brokers make the Asia-Pacific a compelling market. This service takes into account the myriad factors behind the conflicts, partnerships and loose alliances forming in the region, providing a broad market perspective.

IMM - EURASIA

With a geographic purview that includes the states of the former Soviet Union as well as Afghanistan and Pakistan, Eurasia represents a multifaceted security environment characterized by energy politics and conflict flashpoints. Eurasia serves as a convergence point for Russia's assertive foreign policy, growing Chinese influence, latent Islamic fundamentalism, and U.S. and European efforts to ensure access to burgeoning energy markets. International Military Markets-Eurasia offers analytical insight into the complex geopolitical and economic realities of these emerging markets.

IMM - EUROPE

With Europe today dominated by two multinational pillars – the European Union and the NATO Alliance – the continent moves closer to achieving cohesion. But despite its peaceful integration, Europe now faces distinct military shortcomings at a time of great stress along its outer borders. Our IMM-Europe product provides insight into the economies, budget situations, and military compositions and needs of each European country.

International Military Markets Cont.

IMM - LATIN AMERICA & CARIBBEAN

Defense expenditures in Latin America are on the rise as countries across the region respond to the deepening and multifaceted challenge posed by transnational organized crime and seek to build sustainable economic and industrial resilience through the development of local defense manufacturing industries. Brazil, Mexico, Colombia, Argentina and Peru represent dynamic emerging defense markets generating requirements across multiple segments. The International Military Markets - Latin America & Caribbean service provides the insight required to gain a competitive advantage in this complex market.

IMM - MIDDLE EAST & AFRICA

The Middle East and Africa are two of the world's most crucial areas in terms of conflicts, regional security, and important natural resources. As these regions' security challenges intensify, so, too, does the desire for sovereign defense capabilities. IMM - Middle East & Africa takes you inside the myriad developments in these two regions to offer a clear perspective on the geopolitical factors that will shape their futures.

IMM - NORTH AMERICA

The U.S. represents the largest defense market in the world, and the Pentagon is continually adjusting resources in response to dynamic threat environments. The International Military Markets - North America service provides critical analysis of political, economic, and budgetary uncertainties that could impact military acquisition programs in the U.S., Canada, and Mexico, as well as several nations in Central America and the Caribbean. Includes detailed overviews of defense spending trends, ongoing military programs, future requirements, and the force structures of each country.

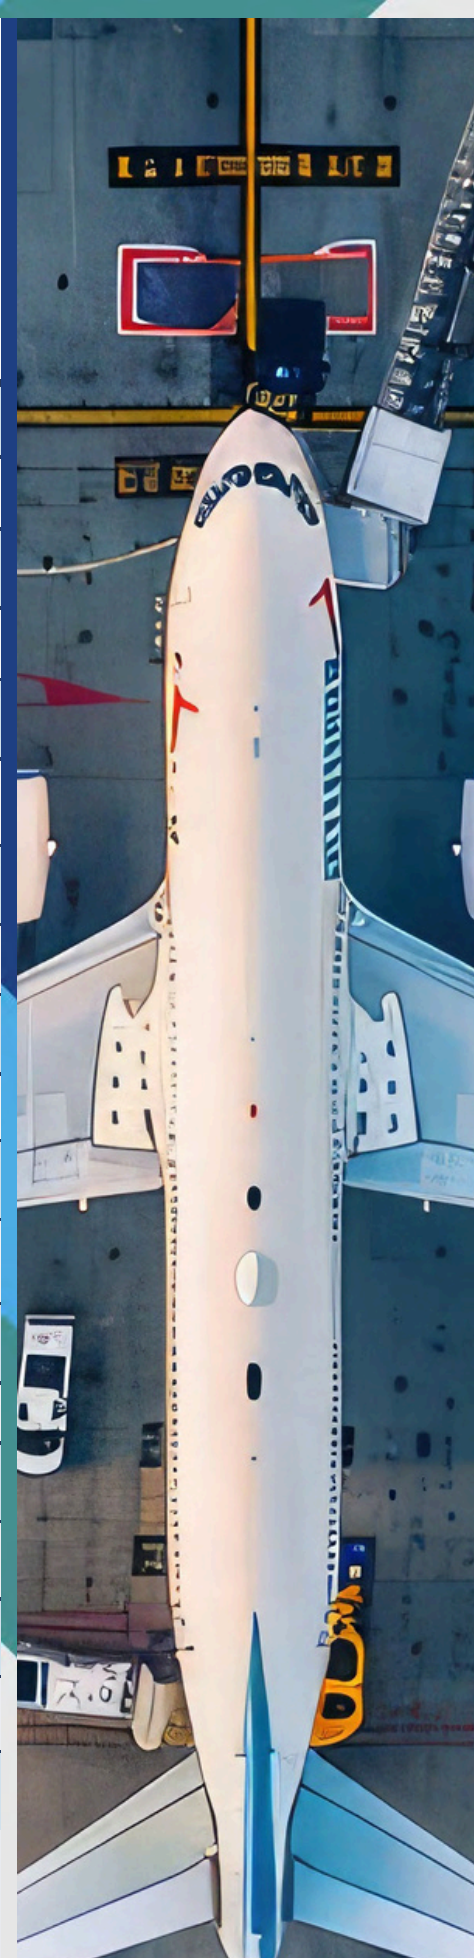

IMM GROUP LIBRARY OPTION

The International Military Markets Group Library brings together Forecast International's six regional IMM services, offering country-by-country assessments of the military capabilities, equipment needs, and inventories of 120+ nations. Each country report combines streamlined Data summaries, Market Overviews of ongoing and planned military programs, and detailed Force Structures listings covering major platforms and systems. The library also includes six regional Market Segment Analyses, 21 complementary appendices, and Excel files identifying weapon systems by country, region, and category—providing a clear, comprehensive view of global defense markets.

Market Segment Packages

Our complete Market Segment Packages provide you with a convenient, cost-effective executive briefing for strategic planning and formal presentations. These packages are annually produced, ensuring you receive the latest forecast data available for your market segment. You receive all essential components via email, including the market analysis in PDF format, related program reports as PDFs, and a supporting Excel workbook containing production and forecast data. This package is an indispensable tool for evaluating long-term market potential and provides the critical data and analysis needed for high-level decision-making.

Online Databases

One year of access

FAA Aircraft Registration Database

We rewrote the database to make it more user-friendly. With an annual subscription, you can run your own customized queries and downloads of active U.S. registrations. Includes N-number, serial number, aircraft manufacturer/model, engine manufacturer/model, year manufactured, type registrant (individual, partnership, etc.), registrant's name, address data (several fields), airworthiness classification, and type of aircraft and engine.

KEY DATA FIELDS			ONLINE DATABASE ONE-YEAR ACCESS
N-Number	Year Manufactured	Address Data (several fields)	
Serial Number	Number of Seats	Airworthiness Date & Classification	
Aircraft Manufacturer/Model	Type Registrant (individual, partnership, etc.)	Type Aircraft, Engine Category	
Engine Manufacturer/Model	Registrant's Name		

Online Databases Cont.

Military Aircraft/Engine Inventories

We provide a comprehensive global listing of approximately **70,750 fixed-wing and rotary-wing military aircraft** and **125,700 major engine designations**, organized by country and branch of service. This intelligence supports aftermarket suppliers and R&M providers who need to identify aircraft and engines suitable for replacement, overhaul, or modernization. All military aircraft are included, along with selected government and Coast Guard fleets. This robust database is fully sortable by user-selected fields, offers subtotalling, and is compatible with most spreadsheet programs. Data includes aircraft, operator, owner, and engine details, with quantities and age metrics provided where applicable. Annual licensing provides **real-time 24/7 access** through our Intelligence Center.

KEY DATA FIELDS			ONLINE DATABASE ONE-YEAR ACCESS
Aircraft Manufacturer	Takeoff Weight (TOW)	Owner Name	
Aircraft Country	Seat Quantity	Owner Country/Region	
Designation & Variant	Aircraft Age	Engine Manufacturer	
Mission Category	Quantity by Year	Engine Designation	
Phase (Active, On Order)	Operator Name	Engine Type	
Tail Number (if applicable)	Operator Type	Engine Age / Quantity by Year	

Industrial & Marine Gas Turbine Installations Database

Intuitive online database lists some **14,305 plants worldwide**, totaling **over 37,539 machines** installed as far back as 1950. **Planned installations through 2033 total over 954**. Covers both **heavy-duty and aeroderivative GTs** used in industrial applications, as well as for marine propulsion. An invaluable tool for aftermarket players, MRO companies, parts makers, and OEMs. A must-have product for those who need to know **Where the Equipment Is, Who Owns It, and Who Operates It**. Searches can be implemented to custom-tailor your report by power range – in kW or HP – and by the specific years of installation, enabling you to capture only the information required. Save and download information in Excel for easy data manipulation.

KEY DATA FIELDS			ONLINE DATABASE ONE-YEAR ACCESS
Manufacturer (100+ listed)	Country	Application

	Fuel Used		

FI Global Intelligence Reports

Any program, country, or company report in PDF format.

Forecast International's **Global Intelligence Reports** provide targeted, decision-ready insight into the systems, platforms, technologies, and capabilities shaping the global aerospace and defense arena. Delivered in a concise PDF format, each report offers a deep analytical profile of a single **program, mission system, technology area, or operational concept**—supported by FI's proven forecasting methodology.

These reports distill complex technical, industrial, and geopolitical factors into clear, actionable intelligence. Each profile typically includes development and upgrade history, procurement and funding trends, production outlooks, operational employment, competitive systems, and a 10-year market forecast. Topics range from advanced aircraft and missile systems to unmanned platforms, space assets, and emerging capabilities.

Designed for executives, strategists, and business development teams, FI's Global Intelligence Reports are ideal for:

- Market and competitive analysis
- Procurement and modernization research
- Capture strategy and opportunity assessment
- Executive briefings and internal planning

Whether evaluating a key weapon system, an enabling technology, or an emerging strategic concept, FI's Global Intelligence Reports deliver authoritative insight in a format optimized for rapid understanding and confident decision-making.

Consulting Services

Proprietary and Confidential Research

When selecting a consulting firm, place your confidence in a proven entity. For over 50-years, our key to success has been the ability to leverage the power of our comprehensive databases and information systems. Our expert analysts process and insightfully interpret the data in order to provide precise and rational solutions. Forecast International's resources and extensive base of experience can be readily adapted and efficiently focused to fulfill a broad spectrum of civil and military consulting requirements.

- Long-Range Forecasting in Support of Strategic Planning
- Product Assessment and Viability Analysis
- Internet Survey Design, Development, and Execution
- Special Development of Competitive Intelligence and Analysis
- U.S. & International Defense Budget Assessment
- Data Support for Mergers, Acquisitions, Teaming, Repositioning, and Offsets
- Military Threat Analysis and Order of Battle Studies
- Special Niche Market Research, Analysis and Forecasting
- Aftermarket Support Evaluation

Contact consulting@forecastinternational.com or call 203.426.0800 for a Confidential Discussion and a No-Obligation Proposal.

AEROSPACE & DEFENSE BRIEFING SESSION

Convene an exclusive group of aerospace and defense influentials for a powerful dialogue around a critical industry topic with a focus on your organization. Sharing insights alongside a premier Forecast International analyst, this invitation-only roundtable features a mission-focused agenda where participants will gain actionable learnings, collaboration on industry challenges, and access to market intelligence - all culminating in tangible executive briefing.

FI Defense Membership

Intelligence built for global defense leaders

Stay ahead of global defense developments with a membership designed to deliver Forecast International's most essential intelligence—concise, timely, and analyst-curated for strategic clarity.

1 Year Membership Includes

Weekly FI Market Recap

Our World Aerospace & Defense Intelligence Letter delivers a fast, authoritative **summary of the week's most important aerospace, defense, and geopolitical developments**. Delivered directly to your inbox. *Designed for senior leaders who need rapid situational awareness.*

Webinars with FI Analysts

Access 4 exclusive FI webinars of your choice featuring deep-dive discussions on major programs, market shifts, capability trends, and regional outlooks lead by expert FI Analysts. *Live and on-demand options available.*

White Papers

Access 12 comprehensive analytical papers written by expert FI Analysts that explore emerging technologies, strategic themes, competitive dynamics, and long-term market implications. *Ideal for internal briefings and strategic planning.*

Why FI Membership

FI Membership provides a steady stream of premium insights—enabling leaders to make faster, more confident decisions in a rapidly shifting defense and aerospace environment. It's the simplest way to stay connected to Forecast International's analytical expertise without the weight of a full platform subscription.

Membership Snapshot

- Continuous, high-value intelligence feed
- Curated by FI's global team of aerospace & defense analysts
- Designed for executives, planners, and business development teams
- Ideal for staying informed between major reports and platform access

FI Aerospace Membership

Intelligence built for aerospace decision-makers

Stay ahead of global aerospace developments with a membership designed to deliver Forecast International's most essential intelligence—concise, timely, and analyst-curated for strategic clarity across commercial and military aviation markets.

1 Year Membership Includes

Weekly FI Market Recap

Our World Aerospace & Defense Intelligence Letter delivers a fast, authoritative **summary of the week's most important aerospace, defense, and geopolitical developments.** Delivered directly to your inbox.
Designed for senior leaders who need rapid situational awareness.

Webinars with FI Analysts

Access two exclusive FI analyst webinars of your choice. Sessions feature deep-dive discussions on major aircraft programs, airframe and engine market trends, commercial fleet forecasts, capability shifts, and regional aerospace outlooks. Live and on-demand options available.

White Papers

Receive **six in-depth analytical papers** written by FI's aerospace specialists. Topics explore emerging technologies, competitive dynamics, platform development timelines, propulsion trends, supply-chain pressures, and long-term market implications.

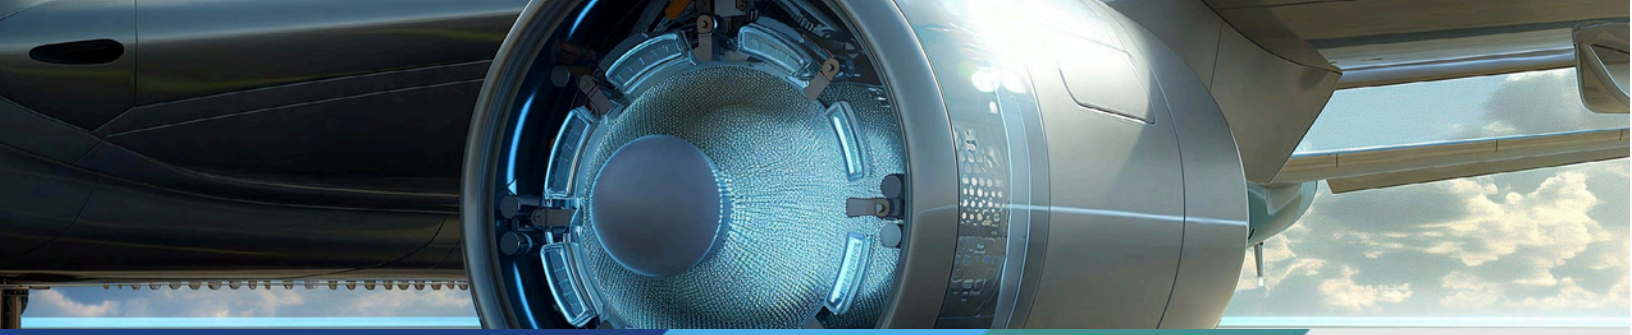

Why FI Membership

FI Aerospace Membership provides a continuous stream of premium insight—empowering leaders to make faster, more confident decisions in a rapidly shifting aerospace environment. It is the easiest way to stay connected to Forecast International's analytical expertise without committing to a full platform subscription.

Membership Snapshot

- Continuous feed of high-value aerospace intelligence
- Curated by FI's global team of commercial and military aviation analysts
- Designed for executives, planning teams, and business development leaders
- Ideal for staying informed between major reports and platform deliverables

Value Added Features

ASK THE ANALYST

Your Forecast International subscription includes direct, complimentary access to our team of industry-leading Analysts. Each service is managed by specialists with deep market expertise, allowing you to engage directly with the experts who produce your content. Use our Analyst Query Service to contact them for immediate clarification, interpretation, or additional insight regarding the data in your subscriptions. This ensures your organization not only receives world-class intelligence but also the expert context and explanation needed to act on it.

FI MARKET RECAP

The FI Market Recap is your weekly, analyst-curated summary of global market developments and intelligence, designed to deliver clearer, more focused insights without adding volume to your inbox. Clients receive a dedicated Market Recap containing news and analysis specific to each service to which they subscribe. This edition is delivered weekly directly to the desks of the users and provides a complete snapshot of the week's most important aerospace, defense, and geopolitical developments, combined with original analysis and interpretive perspectives from our global team of Analysts. What's more, upon the release of each new Market Segment Analysis, our staff posts a summary of its key findings, ensuring you are always current on our latest deep-dive research.

MILITARY PERISCOPE

Military Periscope, an FI sister brand, is the world's most accessible military intelligence platform delivering rapid insight into 7,500+ weapon systems, 165+ armed forces, and 150+ defense companies. With comprehensive order-of-battle data, force structures, global defense news, and profiles of militant organizations, it equips analysts and decision-makers with fast, reliable intelligence. Start your free 7-day trial at www.militaryperiscope.com

WHITE PAPERS

Our team of industry experts release new white papers each month, covering relevant industry analysis and detailed insights on topics that shape both the defense and commercial markets. Read the latest at www.forecastinternational.com
